A	Three Months
B	Six Months
C	One year
D	Three years
E	None of the above
Correct Answer	C
Marks	1

31

Comprehension

Read the passage below and answer the following:

Direct taxes can be graded, not only by taking into account the size of a person's income, but also considering the use he makes of it and making suitable allowances. The proportion of taxable income may be reduced by allowances for expenses incurred on behalf of children of school age or dependent relatives or for money spent on insurance. Such a system of grading is not possible in case of indirect taxation. When you go to the cinema, the man who takes your money does not ask you how much you earn, calculate the tax incurred and charge you accordingly. So that indirect taxation is the same for all sectors of community, rich and poor alike. A drawback is that the burden of taxation on small incomes is increased, since the obvious things to tax are those for which there is a constant pronounced demand so as to make them almost necessities.

Question Description

The levels of direct tax are decided on the basis of

A

allowances for expenses on children, dependents and insurance

B

differing expenditure of the rich and poor

C

the size of a person's income

D

actual income, its use and appropriate allowances

E

None of the above

Correct Answer

D

Marks

1

Comprehension

Read the following passage and answer the question below:

Time, as we know it, is a very recent invention. The modern time-sense is hardly older than the United States. It is a by-product of industrialism- a sort of psychological analogue of synthetic perfumes and aniline dyes. Time is our tyrant. We are chronically aware of the moving minute hand, even of the moving second hand. We have to be ... Our consciousness of the smallest units of time is now acute. To us for example, the moment 8.17 a.m. means something – something very important, if it happens to be the starting time of our daily train. To our ancestors, such an odd eccentric instant was without significance- did not even exist. In inventing the locomotive, Watt and Stephen were part inventors of time.

Question Description

In the passage, the phrase, “a very recent invention”, implies that time has been

A

a new phenomenon of our time

B

manufactured in this age

C

perceived in a certain way in this age

D

scientifically studied of late

E

None of the above

Correct Answer

C

Comprehension

Read the following passage and answer the question below:

Time, as we know it, is a very recent invention. The modern time-sense is hardly older than the United States. It is a by-product of industrialism- a sort of psychological analogue of synthetic perfumes and aniline dyes. Time is our tyrant. We are chronically aware of the moving minute hand, even of the moving second hand. We have to be ... Our consciousness of the smallest units of time is now acute. To us for example, the moment 8.17 a.m. means something – something very important, if it happens to be the starting time of our daily train. To our ancestors, such an odd eccentric instant was without significance- did not even exist. In inventing the locomotive, Watt and Stephen were part inventors of time.

Question Description

Read the following statements and arrange them in a chronological sequence, with the help of the passage:

- (i) So much so, time has become our task master as it controls our day-to-day activities in life.
- (ii) Interestingly, the present sense of time has been a fallout of industrialism which, on a mental level, is comparable to the manufacture of synthetic perfumes.
- (iii) But our own time sense is now chronologically acute and minute.
- (iv) To our predecessors, time in the sense of a stray, unconventional moment was insignificant, or even non-existent.

A (iii); (ii); (iv); (i)

B (iv); (iii); (i); (ii)

C (i); (ii); (iii); (iv)

D (iv); (ii); (i); (iii)

E None of the above

Correct Answer B
