Read the Passage below and answer the following questions:

We in India have our own special problems. No one can deny that some of them are of a serious nature and must be attacked with *vigour* and determination. Our national objectives have been defined clearly. We aim at providing every citizen with basic necessities and complete freedom to lead a life of his or her choice. We aim to create a democratic society, strong and free, in which every citizen, irrespective of his religious beliefs, will occupy an equal and honoured place, and be given full and equal opportunities for growth and service. We aim at ending untouchability and doing away with the present inequalities of status and wealth. We are opposed to the concentration of wealth in a few hands.

Read the Passage below and answer the following questions:

Those responsible for teaching young people have resorted indifferent periods in history to a variety of means for making their pupils learn. The earliest of those was the threat of punishment, which meant that the pupil who was slow, careless or inattentive risked either physical chastisement or the loss of some expected privilege or treat. Learning was thus to some extent associated with fear, particularly in the minds of those who found certain subjects hard to master. At a later period, pupils were encouraged to learn in the hope of some kind of reward. This often took the form of marks awarded daily or weekly for work done and sometimes of prizes given at the end of each year to the best scholars. Such a system appealed to the competitive spirit but it often had just as depressing an effect as the older system of punishment on the slow but willing pupil.

**Question Description**
