Read the passage and answer the following question:

A broad range of decisions, situations and problems may be encountered in the real estate field. An illustrative one is the question of whether to buy or lease. In some cases, of course, there may be no real choice. A company may have special requirements that make leasing difficult. Or they may be such a shortage of capital that owning is out of the question. But often such restrictions do not apply. Some managers may prefer to develop policies to guide decisions as to ownership or leasing of real property. The experiences of some businessmen bias them in favour of ownership. For example, a manager who has lost a desirable location through the expiration of a lease is likely to establish the policy that ownership is to be preferred in all but the most favourable lease situation. The company which uses its location extensively in advertising and public relation efforts is apt to favour ownership very strongly against leasing.
