1	<b>Question Description</b>	<p>Consider a relational table with a single record for each registered student with the following attributes.</p> <ol style="list-style-type: none"><li>1. Registration_Number: Unique registration number for each registered student</li><li>2. UID: Unique Identity number, unique at the national level for each citizen</li><li>3. BankAccount_Number: Unique account number at the bank. A student can have multiple accounts or joint accounts. This attributes stores the primary account number.</li><li>4. Name: Name of the Student</li><li>5. Hostel_Room: Room number of the hostel</li></ol> <p>Which of the following options is INCORRECT?</p>
	<b>A</b>	If S is a superkey such that S UID is NULL then $S \cup UID$ is also a superkey
	<b>B</b>	Registration_Number can be a primary key
	<b>C</b>	UID is a candidate key if all students are from the same country
	<b>D</b>	BankAccount_Number is a candidate key
	<b>E</b>	None of the above
	<b>Correct Answer</b>	D
	<b>Marks</b>	1

2

**Question Description**

Consider the following ER diagram

The minimum number of tables needed to represent M, N, P, R1, R2 is

- |                       |                   |
|-----------------------|-------------------|
| A                     | 2                 |
| B                     | 3                 |
| C                     | 4                 |
| D                     | 5                 |
| E                     | None of the above |
| <b>Correct Answer</b> | B                 |
| <b>Marks</b>          | 1                 |

3

**Question Description**

Database table by name Loan\_Records is given below.

Borrower |Bank\_Manager | Loan\_Amount

Ramesh | Sunderajan | 10000.00

Suresh | Ramgopal | 5000.00

Mahesh | Sunderajan | 7000.00

What is the output of the following SQL query?

```
SELECT Count(*)
FROM ( ( SELECT Borrower, Bank_Manager
FROM Loan_Records) AS S
NATURAL JOIN ( SELECT Bank_Manager, Loan_Amount
FROM Loan_Records) AS T );
```

A	3
B	9
C	5
D	6
E	None of the above
<b>Correct Answer</b>	C
<b>Marks</b>	1

4

<b>Question Description</b>	Host A has IP address 192.168.1.97 and is connected through two routers R1 and R2 to another host B with IP address 192.168.1.80. Router R1 has IP addresses 192.168.1.135 and 192.168.1.110. R2 has IP addresses 192.168.1.67 and 192.168.1.155. The netmask used in the network is 255.255.255.224. How many distinct subnets are guaranteed to already exist in the network?
<b>A</b>	2
<b>B</b>	1
<b>C</b>	3
<b>D</b>	6
<b>E</b>	None of the above
<b>Correct Answer</b>	C
<b>Marks</b>	1

5

### Question Description

A relational schema for a train reservation database is given below.

Passenger (pid, pname, age)

Reservation (pid, class, tid)

Table: Passenger

pidpname age

-----

0 Sachin 65

1 Rahul 66

2 Sourav 67

3 Anil 69

Table : Reservation

pid classtid

-----

0 AC 8200

1 AC 8201

2 SC 8201

5 AC 8203

1 SC 8204

3 AC 8202

What pids are returned by the following SQL query for the above instance of the tables?

```
SELECT pid
```

```
FROM Reservation ,
```

```
WHERE class 'AC' AND
```

```
EXISTS (SELECT *
```

```
FROM Passenger
```

```
WHERE age > 65 AND
```

```
Passenger.pid = Reservation.pid)
```

A

1,0

<b>B</b>	1,2
<b>C</b>	1,3
<b>D</b>	1,5
<b>E</b>	None of the above
<b>Correct Answer</b>	<b>C</b>
<b>Marks</b>	1

6

**Question Description**

The best time(s) when regression testing should be done?

1. As frequently as possible
2. When the environment has been modified
3. After the software has been modified

Which of the following statements are correct?

**A**

2,3

**B**

1,3

**C**

2

**D**

3

**E**

None of the above

**Correct Answer**

A

**Marks**

1

7

**Question Description**

Consider the following three statements about link state and distance vector routing protocols, for a large network with 765 network nodes and 3000 links.

1. The computational overhead in link state protocols is higher than in distance vector protocols.
2. After a topology change, a link state protocol will converge faster than a distance vector protocol.
3. A distance vector protocol (with split horizon) avoids persistent routing loops, but not a link state protocol.

Which one of the following is correct about 1, 2, and 3 ?

**A**

1,2,3 are true

**B**

1,2 are true but 3 is false

**C**

1,3 are true but 2 is false

**D**

1,2,3 are false

**E**

None of the above

**Correct Answer**

C

**Marks**

1

8

**Question Description**

\_\_\_\_\_ shows a full or partial view of the structure within a precise time for a modelled system?

**A**

Sequence Diagram

**B**

Collaboration Diagram

**C**

Class Diagram

**D**

Object Diagram

**E**

None of the above

**Correct Answer**

D

**Marks**

1

9

**Question Description**

The address of a class B host is to be split into subnets with a 6-bit subnet number. What is the maximum number of subnets and the maximum number of hosts in each subnet?

**A**

62 subnets and 262142 hosts.

**B**

64 subnets and 262142 hosts.

**C**

62 subnets and 1022 hosts.

**D**

64 subnets and 1024 hosts.

**E**

None of the above

**Correct Answer**

C

**Marks**

1

10

<b>Question Description</b>	Who is responsible for designing templates in a content management system?
<b>A</b>	Web Developer
<b>B</b>	Admin User
<b>C</b>	Content Writer
<b>D</b>	Database admin
<b>E</b>	None of the above
<b>Correct Answer</b>	C
<b>Marks</b>	1

11	<b>Question Description</b>	Which one of these is NOT true about a Firewall?
A		It can maintain logs
B		It protects against viruses that are in the PC
C		It is used to enforce a Security Policy
D		It can shield internal network from the outside insecure network
E		None of the above
	<b>Correct Answer</b>	B
	<b>Marks</b>	1

12	<b>Question Description</b>	Consider the following C++ code: <pre>#include&lt;iostream&gt; using namespace std;  enum test { a=1, b, c</pre>
----	-----------------------------	---

```
};  
int main()  
{  
int x = c;  
int&y = x;  
int&z = x;  
y = b;  
--y;  
cout<< z--;  
return 0;  
}
```

- |   |                   |
|---|-------------------|
| A | 0                 |
| B | 1                 |
| C | 2                 |
| D | 3                 |
| E | None of the above |

Correct Answer	B
13 Marks Question Description	1 Which one of the following are essential features of object oriented language?  1. Abstraction and encapsulation  2. Strictly-typed  3. Type-safe property coupled with sub-type rule  4. Polymorphism in the presence of inheritance
A	1 and 2 only
B	1, 4 and 2 only
C	1 and 4 only
D	1, 3 and 4 only
E	None of the above

**Correct Answer**

C

**Marks**

1

14

**Question Description**

Which of the following C++ code will give error on compilation?

Code 1:

```
#include <iostream>
using namespace std;
int main(intargc, char const *argv[])
{
cout<<"Hello World";
return 0;
}
```

Code 2:

```
#include <iostream>
int main(intargc, char const *argv[])
{
std::cout<<"Hello World";
return 0;
}
```

**A**

Code 1 only

**B**

Code 2 only

<b>C</b>	Neither Code 1 nor Code 2
<b>D</b>	Both Code 1 and Code 2
<b>E</b>	None of the above
<b>Correct Answer</b>	<b>C</b>
<b>Marks</b>	1

15

<b>Question Description</b>	Three routers A,B,C are connected serially with links A-B,B-C. The routers exchange distance vector routing information and have converged on the routing tables, after which the link B-C fails. Assume that AA and BB send out routing updates at random times, each at the same average rate. The probability of a routing loop formation (rounded off to one decimal place) between AA and BB, leading to count-to-infinity problem, is _____.
<b>A</b>	0.2
<b>B</b>	0.8
<b>C</b>	1.0
<b>D</b>	0.5
<b>E</b>	None of the above
<b>Correct Answer</b>	<b>D</b>
<b>Marks</b>	1

16

**Question Description**

Which of the following is not an attack in network security?

A

Masquerading attack

B

Man in the middle attack

C

Insinuation attack

D

Denial of Service attack

E

None of the above

**Correct Answer**

C

**Marks**

1

17

**Question Description**

The Octal number to be given along with chmod command to make a file readable, writable and executable to the owner, readable and executable to group and others is:

A

277

B

755

C

744

D

555

E

None of the above

**Correct Answer**

B

**Marks**

19	<b>Question Description</b>	The domain name system is maintained by _____
	<b>A</b>	Distributed Servers
	<b>B</b>	Distributed Database System
	<b>C</b>	Distributed Computer Network
	<b>D</b>	None of the above
	<b>E</b>	None of the above
	<b>Correct Answer</b>	B
	<b>Marks</b>	1

20	<b>Question Description</b>	Exception handling is possible in SQL Server using _____
	<b>A</b>	FINAL
	<b>B</b>	THROW
	<b>C</b>	FINALLY
	<b>D</b>	PUT
	<b>E</b>	None of the above
	<b>Correct Answer</b>	B
	<b>Marks</b>	1

21

**Question Description**

Consider the following java code snippet

```
boolean isPowerOfTwo (int x) {
```

```
// Insert code here
```

```
}
```

Which of the following options determines whether the number is power of 2?

A `return x!=0 && (((x-1)&(x-1)) == 0);`

B `return x!=0 && ((x&(x+1)) == 0);`

C `return x!=0 && (((x-1)&(x+1)) == 0);`

D `return x!=0 && ((x&(x-1)) == 0);`

E None of the above

**Correct Answer** D

**Marks** 1

22

<b>Question Description</b>	Every host in an IPv4 network has a 1-second resolution real-time clock with battery backup. Each host needs to generate up to 1000 unique identifiers per second. Assume that each host has a globally unique IPv4 address. Design a 48-bit globally unique ID for this purpose. After what period (in seconds) will the identifiers generated by a host wrap around?
<b>A</b>	32
<b>B</b>	64
<b>C</b>	128
<b>D</b>	256
<b>E</b>	None of the above
<b>Correct Answer</b>	B
<b>Marks</b>	1

23

**Question Description**

In agile method Which of these isn't a sprint event?

A

Sprint Planning

B

Daily Stand Up

C

Sprint Subjugation

D

Sprint Review

E

None of the above

**Correct Answer**

C

**Marks**

24

**Question Description**

Reorder the following activities in requirement elicitation process:

1. Consolidation
2. Evaluation
3. Listing out Requirements
4. Identifying Stakeholders
5. Prioritizing
6. Requirements Gathering

**A**

2,5,4,1,3,6

**B**

4,3,6,2,5,1

**C**

3,4,6,5,1,2

**D**

4,3,6,2,1,5

**E**

None of the above

**Correct Answer**

B

**Marks**

1

25

**Question Description**

Consider a database that has the relation schema EMP (EmpId, EmpName, and DeptName). An instance of the schema EMP and a SQL query on it are given below.

<u>Emp</u>	<u>EmpName</u>	<u>DeptName</u>
1	XYA	AA
2	XYB	AA
3	XYC	AA
4	XYD	AA
5	XYE	AB
6	XYF	AB
7	XYG	AB
8	XYH	AC
9	XYI	AC
10	XYJ	AC
11	XYK	AD
12	XYL	AD
13	XYM	AE

The SQL query is as follows:

```
Select avg(EC.num)
```

```
From EC
```

```
Where(DeptName, Num) IN (Select DeptName, Count(Empid) AS EC(DeptName,Num) From EMP Group by DeptName)
```

**A** 2.9

**B** 2.8

26	<b>Question Description</b>	Does Apache act as Proxy server?
	A	Yes, using priv_proxy module.
	B	Yes, by default
	C	Yes, using mod_proxy module.
	D	No
	E	None of the above
	<b>Correct Answer</b>	C
	<b>Marks</b>	1

27	<b>Question Description</b>	In which part of the HTML metadata is contained?
	A	Head Tag
	B	Title Tag
	C	Body Tag
	D	Html Tag
	E	None of the above
	<b>Correct Answer</b>	A
	<b>Marks</b>	1

**Question Description**

Which of the following statements are TRUE about an SQL query?

P: An SQL query can contain a HAVING clause even if it does not have a GROUP BY clause

Q : An SQL query can contain a HAVING clause only if it has a GROUP BY clause

R : All attributes used in the GROUP BY clause must appear in the SELECT clause

S : Not all attributes used in the GROUP BY clause need to appear in the SELECT clause

A P and R

B P and S

C Q and R

D Q and S

E None of the above

**Correct Answer** B

**Marks** 1

29	<b>Question Description</b>	A company needs to develop digital signal processing software for one of its newest inventions. The software is expected to have 40000 lines of code. The company needs to determine the effort in person-months needed to develop this software using the basic COCOMO model. The multiplicative factor for this model is given as 2.8 for the software development on embedded systems, while the exponentiation factor is given as 1.20. What is the estimated effort in person-months?
	<b>A</b>	234.25
	<b>B</b>	230.5
	<b>C</b>	232
	<b>D</b>	238.14
	<b>E</b>	None of the above
	<b>Correct Answer</b>	A
	<b>Marks</b>	1

30	<b>Question Description</b>	Constraints can be represented in UML by
	<b>A</b>	Constraint
	<b>B</b>	[text]
	<b>C</b>	{text}
	<b>D</b>	(text)
	<b>E</b>	None of the above
	<b>Correct Answer</b>	C
	<b>Marks</b>	1

**Comprehension**

Read the passage and answer the following questions

Of all areas of learning the most important is the development of attitudes. Emotional reactions as well as logical thoughts process affect the behaviour of most people. The burnt child fears the fire” is one instance, another is the rise of despots like Hitler. Both these examples also point out the fact that attitudes stem from experiences. In the one case, it was direct and impressive, in the other it was indirect and cumulative. The Nazis were indoctrinated largely by the speeches they heard and the books they read. The class-room teacher in the elementary school is in a strategic position to influence attitudes.

**Question Description**

Identify from the options given below, a word or phrase that is a synonym of the term ‘cumulative’ in the sense it is used in the passage

**A**

unimpressive

**B**

immediate

**C**

snowballing

**D**

delayed

**E**

None of the above

**Correct Answer**

C

**Marks**

1

**Comprehension**

Read the passage and answer the following questions

Of all areas of learning the most important is the development of attitudes. Emotional reactions as well as logical thoughts process affect the behaviour of most people. The burnt child fears the fire” is one instance, another is the rise of despots like Hitler. Both these examples also point out the fact that attitudes stem from experiences. In the one case, it was direct and impressive, in the other it was indirect and cumulative. The Nazis were indoctrinated largely by the speeches they heard and the books they read. The class-room teacher in the elementary school is in a strategic position to influence attitudes.

**Question Description**

From the passage it appears that the term ‘attitudes’ means ----

**A**

fear of the burnt child

**B**

experiences of most people

**C**

emotional responses and logical thinking

**D**

thinking, feeling and behaviour

**E**

None of the above

**Correct Answer**

D

**Marks**

36

**Comprehension**

Read the passage and answer the following question:

A broad range of decisions, situations and problems may be encountered in the real estate field. An illustrative one is the question of whether to buy or lease. In some cases, of course, there may be no real choice. A company may have special requirements that make leasing difficult. Or they may be such a shortage of capital that owning is out of the question. But often such restrictions do not apply. Some managers may prefer to develop policies to guide decisions as to ownership or leasing of real property. The experiences of some businessmen bias them in favour of ownership. For example, a manager who has lost a desirable location through the expiration of a lease is likely to establish the policy that ownership is to be preferred in all but the most favourable lease situation. The company which uses its location extensively in advertising and public relation efforts is apt to favour ownership very strongly against leasing.

**Question Description**

Select a word or phrase from the passage which is not necessarily confined to 'real estate'

**A**

capital

**B**

real property

**C**

leasing

**D**

ownership

**E**

None of the above

**Correct Answer**

A

**Marks**

**Question Description**

Directions: Study the following information carefully and answer the questions given below:

Twelve persons are sitting in two parallel rows containing six persons each, in such a way that there is an equal distance between adjacent persons. In row 1 – Joshi, Jaya, Jeet, Jamal, Juber and Jina are seated and all of them are facing south. In row 2 – Prem, Pinu, Pal, Punj, Poran and Pooja are seated and all of them are facing north. Therefore, in the given seating arrangement each member seated in a row faces another member of the other row.

Only one person sits between Jaya and Jina. Joshi sits third to the left of Juber. Neither Prem nor Poran faces Juber or Joshi. Prem does not sit at an extreme end. Jeet does not face Prem and Jeet does not sit at an extreme end of the line. Prem sits second to the right of Poran. Only one person sits between Pooja and Pal. Neither Joshi nor Juber sit at extreme end of the line. Pooja is not an immediate neighbour of Pinu and Prem does not face Jina. Neither Pooja nor does Pal face Juber. Pal does not sit at the extreme end.

How many person(s) sit(s) between Juber and Joshi?

**A**

None

**B**

One

**C**

Two

**D**

**Question Description**

Preet's family had 6 members Preet, Geet, Shiva, Roop, Daya and Moni. Each of them was related to Preet in some manner: Mother, Father, Sister, Wife and Brother. They were seated in a row, facing east. They were aged differently. It is known that any child and his/her spouse would be younger to his/her parents. Any husband would not necessarily be elder to his wife.

Preet's wife was 32 years old.

Preet's father was 7 years younger than Preet's mother.

Geet was 29 years old and was to the immediate left of Preet's brother.

Daya was seated at one of the extreme ends at a gap of 3 from Preet's father.

Preet's father was to the immediate right of the one who was 30 years old.

Daya was 33 years elder to Moni.

Preet was 3rd to the left of his sister.

The one who was 34 years old was neighboring Daya.

Roop was to the immediate left of Moni.

Who among the following is the youngest in the family?

**A** Preet

**B** Preet's wife

**C** Preet's sister

**D** Shiva

**E** None of the above

**Correct Answer** C

**Question Description**

Ankit, Ankush, Amjad, Akash, Akshay, Ashish, Ashad and Arman, were sitting around a circular table, facing towards the centre. These persons were playing cards and have won a different amount of money.

Amjad was sitting neighboring Ankush and Ashish and won Rs. 40. The person, who was sitting opposite to the person neighboring Ankit, won Rs. 30. One of the persons won Rs. 50. Ankush was sitting third to the right of the person, who won the highest amount. Ankit was sitting exactly opposite to the one, who won the highest amount. Every person won at least Rs. 20. Sum of the money won by Ashad and Arman was more than the money won by Ankush but less than the one who won the highest amount. The sum of the amount won by Ankit and his neighbors was Rs. 200. Ankit won the less money than his neighbors. Akash won Rs. 80, and was not an immediate neighbour of the one who won highest amount of money. Ankush and his neighbours and the person sitting opposite to him did not win the least amount of money. Arman won more money than only one person. One of the persons won Rs. 20. The person sitting opposite to Amjad won Rs. 60 which is half of the sum of the amount won by the ones, who won the highest and the lowest amount of money.

How many person(s) were sitting between the ones who won the highest amount and the least amount, when counted from the left of the one who won the least amount?
