**Comprehension**

Read the passage and answer the questions below:

Stereotyping is a type of generalization which attributes traits or characteristics to everyone in a large group. People who stereotype tend to have fixed and unbending opinions. They respond to challenges by distorting reality, rather than consider their assumptions and conclusions, which they have labelled as the truth. What happens is that the facts are compared to the stereotype and then rejected, because they do not fit the stereotype. Stereotyping is often caused by ethno-centrism. The ramifications of stereotyping are that it:

- Forces us to choose ideas
- Causes destructive competition
- Alienates us from others
- Leads to narrow thinking

We end up denying dignity to others, whom we stereotype, and generate unhappiness all around us.

**Question Description**

Those who tend to stereotype are not likely to

**Comprehension**

Read the passage and answer the questions below:

Most malnutrition is invisible. Consistent undernutrition, together with bouts of infection and diarrhoea, can retard growth so gradually as to go unnoticed by the mother. Unless a child is seriously underweight or shows obvious signs of malnutrition (listlessness, discoloured hair, irritability, frequent crying, distended stomach) his condition of undernutrition may not be visible to the mother. For timely prevention of malnutrition, the UNICEF has been using the simple inexpensive method of growth monitoring charts which helps mothers whether or not their children are growing and gaining weight correctly and thus can be an effective aid to sound child health and nutrition. The first requirement for children and adults who are undernourished and living at subsistence level is adequate quantity of food. The next is nutritious food, containing all the elements necessary to support life and maintain good health.
