Comprehension

Read the passage and answer the questions below:

We are flying blind into a highly unknown future. The changes are going to affect every human being and every ecosystem on the face of the earth and we have only a glimmer of what these changes will be. The atmosphere is supposed to do two things for us: maintain a constant climate of oxygen, nitrogen and water vapour, and help maintain the radiation balance—for example by keeping out

excessive ultraviolet. The unthinkable is that we are distorting this atmospheric balance. We are shifting the chemical balance so that we have more poisons in the atmosphere—ozone and acid rain on the ground level—while we are also changing the thermal climate of the earth through the greenhouse effect—and get this – simultaneously causing the destruction of our primary filter of ultraviolet light. It is incredible.

Read the passage and answer the questions below:

Like all real artists the short story writer holds up the mirror to Nature in all its complexity and diversity. Nothing is too small or too big for the writer's pen but all is grist to his mill. All that is expected of a good story is that it should read well, hold the attention of the reader and leave a satisfying feeling at the end...Some of the finest short stories in English are written by American, English and Indian authors. O'Henry's 'The Robe of Peace' is a moving story in a deceptively casual style, about the transformation of a young American dandy into a serene monk who has achieved peace. 'The Miracle of Puran Bhagat' is one of Rudyard Kipling's masterpieces which tells the story of an English-educated Dewan of a Princely state of North India, who renounces power and pelf to become a Bhagat and who saves a whole village from a Himalayan landslide before he himself breathes his last.
