Comprehension

Read the following passage and answer the questions given below: -

The examination system is both an opiate and a poison. It is an opiate because it lulls us into believing that all is well when most is ill. 'Look,' the public says, 'at this list of scholarships; see how many children have got their School Certificates: something is happening; the school is doing its job.' Something no doubt is happening; but it may not be education: it may be the administration of a poison which paralyses or at least slows down the natural activities of the healthy mind. The healthy human being finding himself a creature of unknown capacities in an unknown world, wants to learn what the world is like, and what he should be and do in. To help him in answering these questions is the one and only purpose of education

Question Description

As an opiate and a poison, the examination system respectively

A paralyses or slows down natural activities and lulls the healthy mind

B lulls the healthy mind and paralyses or slows down its physical activities

C paralyses or slows down natural activities and lulls the mind

D lulls the healthy mind and paralyses or slows down its natural activities

E None of the above

Correct Answer D

Marks 1

Comprehension

Read the following passage and answer the questions given below: -

When we begin to study a phenomenon, we do not actually know what we are studying. In order to learn more about it, we formulate a hypothesis. It is important to keep in mind however, that until we thoroughly test our hypothesis and compare the results of our experiments with its predictions, we are not on solid ground. Of course, where there are gaps in our knowledge, we must have a hypothesis, but we must also test that hypothesis—rigorously and with an uncompromising regard for the truth. Where the hypothesis is inaccurate, we must do more research. The hypothesis of the industrial civilization was that by acquiring and consuming more things we would become more happy, fulfilled, and healthy. Every day, this seems less likely

Question Description

Find the word or phrase from the passage that can be an alternative for “an untested idea suggested as an explanation for something”

A

hypothesis

B

phenomenon

C

experiment

D

prediction

E

None of the above

Correct Answer

A

Question Description

Kindly study the paragraph given below and answer the question that follows.

Recently, the Sensex 30 hurtled past 36,000 and the Nifty50 scaled 11000, voices of caution were drowned out by those celebrating the fastest 1000-point gain in the Sensex. Domestic market players continue to conjure up a variety of justifications for these gains — IMF's bullish forecast, earnings revival, budget reforms, the January effect and surging domestic flows. But Indian investors still have the most to worry about a possible melt-up scenario, because with the Sensex 30 is one of the most expensive markets in the world and at the current levels, allows little margin of safety for disappointments. Inveterate bulls argue that this time it's different because India's stock rally in the last three years has been powered more by sticky domestic retail money, than fickle foreign flows.

Which of the following weakens the claim that the stock rally would be a sustained one this time?

I. Market intermediaries and funds have everything to gain from ballooning assets.

II. The Sensex 30's price-earnings ratio is at 25.2 times and is at a very steep valuation already.

III. Most of the domestic money flooding into equities now is not from patient or informed investors.

A

Only III

B

Only I and II

C

Only II and III

D

Only I and III

E

None of the above

Correct Answer

A

Question Description

Directions: The below mentioned question is to be answered using the statements I and II given below. You have to determine the statement(s) which is/are sufficient to answer the question and mark the option accordingly.

8 persons viz. B,D,K,F,H,J,L and N are standing in a linear row facing towards the north. What is the position of H from the right end, if number of persons between H and E are 2?

Statement I : F is second to the left of G, who is on the immediate right of H. No person stands between J and B. B is second to the left of E.

Statement II : E is third to the right of B. J is not an immediate neighbor of L. F and L are not adjacent. H is on the immediate right of F.

A

If the data in statement I alone is sufficient to answer the question

B

If the data in statement II alone is sufficient to answer the question

C

If the data in statements I and II is necessary to answer the question

D

If the data in statements I and II is not sufficient to answer the question

E

None of the above

Correct Answer

D

Question Description

Directions : In question, some statements are given, followed by two conclusions I and II. You have to consider the statements to be true, even if they seem to be at variance from commonly known facts. You have to decide which of the given conclusions, if any, follow from the given statements. Indicate your answer.

Statements:

All pens are pencils

No pencil is an eraser

Conclusions:

I. No eraser is a pen

II. No pencil is an eraser

A

If only conclusion I follow

B

If only conclusion II follow

C

If neither conclusion I nor conclusion II follows

D

If both the conclusions follow

E

None of the above

Correct Answer

D
